

Product Engineer/QC Position

Responsibilities:

Implementation and management of the engineered wood products quality control/assurance program, oversight of plant yield, technical and analytical support, and business improvement initiatives. Research new technology, processes and products, provide technical advice and participate in maintenance initiatives such as preventative, failure resolution, reliability and project implementation. Demonstrate commitment to safety, quality, environmental awareness and continuous process improvement. This position will be a key part of the White City EWP plant management team.

Basic Qualifications:

B.S. Civil/Structural Engineering, Wood Science, or equivalent degree. Requires 5+ years' experience in manufacturing engineered wood products and leading the quality control/assurance program. Ability to troubleshoot complex problems using root cause analysis techniques and recommend solutions. Must be able to perform job duties with limited supervision and make decisions quickly. Possess the ability to effectively communicate with a range of people, including internal and external suppliers and customers.

Preferred Qualifications: Experience in engineered wood products quality control/assurance program.

Incentive Level : 10%

FLSA Status (Exempt/Nonexempt) : Exempt/Salaried

Benefits for this position

- Retirement plan
- Health, dental, and vision coverage
- Life insurance
