

GRADUATE RESEARCH OPPORTUNITIES

M.S. & Ph.D students sought for Fall 2018

Multiple faculty members are seeking MS and PhD level graduate assistants to join their collaborative research teams. MS level positions typically last 24 months while average PhD level positions last 3 years.

The assistants will be appointed at a 0.49 FTE (full-time equivalent) position and are required to work 20 hours per week for research support, with their remaining time devoted to academic studies. The assistantship provides the following amenities to support graduate study:

Monthly stipend of \$1,898 to \$2,043

Paid tuition

Over 88% of insurance costs & mandatory student fees covered

The graduate assistants will be working on research projects supported by the National Science Foundation Center for Wood-Based Composites (WBC), which is an industry/university cooperative research center, federally funded grants, and internal grants. Opportunity to seek dual major degrees with College of Engineering also exists. Candidates should have BS degree in Wood Science / Material Science / Engineering (CE or ME) or related field.

For more information interested students should contact:
