Job Description:

Summary

The Engineering internship role provides students with the opportunity to apply academic knowledge and skills in a professional environment, and to promote the graduate's career goals through contact with professionals in their field of study. The internship experience enables students to participate in professional activities for the Volvo Dublin, Virginia facility by working on important and innovative projects.
Professional Objectives

During the internship, the student will be trained in the computer systems necessary to perform the industrial engineering job. The intern will be exposed to many of the facets of industrial engineering both traditional industrial engineering roles and those that are more specific to a Volvo Trucks industrial engineer. One objective is that the intern will be utilized to assist the senior industrial engineers in various tasks. A second objective is that the intern will at some point during the internship be assigned ownership of a section of the assembly line as the IE. Our goal is to secure that the intern have a full understanding of industrial engineering in the manufacturing environment and as much practical application as possible.

Skill Set Requirements and Minimum Education Requirements

- Applicants must be pursuing an Industrial Engineering undergraduate degree at an accredited school and have completed 30 semester hours prior to the start of the internship
- Applicants must have a minimum cumulative grade point average of 3.0.
- Applicants should be interested in pursuing a professional career in a manufacturing facility upon graduation
- Applicants should also have a working knowledge of MSWord, MSExcel, and Computer Aided Drafting programs
